LOAN POLICY

All items listed in the CURRENT LIST OF MEDICAL LITERATURE are available at the National Library of Medicine. Readers who cannot obtain the journals at local libraries and who cannot come to the National Library of Medicine in person may use the interlibrary loan services of the National Library of Medicine, which is designed to extend the services of the Library at a distance.

WHAT MAY BE BORROWED. All printed literature in the Library's collection is available for loan, with the exception of ordinary current, in-trade publications where the presumption of wide-spread accessibility elsewhere is reasonable.

WHO MAY BORROW. The National Library of Medicine will loan material only to other libraries; individuals must route their requests through these libraries.

FORM OF LOANS. Material in the Library will be loaned in the original form or as photoduplicates (microfilm or photoprints). The National Library of Medicine reserves the right to determine in which form the loan will be made.

INSTRUCTIONS

1. Requests for interlibrary loans are to be made in writing, using either the ALA Interlibrary Loan Form or the NLM Interlibrary Loan Form, available from the Circulation Section, National Library of Medicine. All requests must be signed, and the signature shall be understood to be certification that the material requested is not available in the requesting library.

2. Requests for loans should contain full bibliographic information. A request for an article should show the name of the journal, date of issue, volume number, author, and title of the article, and the pages (inclusive numbering) on which the article appears.

3. Loans of original works are made on condition that the greatest care be taken in packing and transmitting material for return to the National Library of Medicine. Among other precautions, the corners and edges of books must be well protected; unbound material should not be rolled but should be sent flat, preferably by mail. All returns must be adequately insured.

4. The borrowing library may retain original material four weeks from the date of receipt at the library. No renewals are granted. Any item may be recalled by the National Library of Medicine at any time. Interlibrary loans in the form of photocopies may be retained permanently by the borrowing library.

OUTSTANDING COUPONS

The effective date of the change in photoduplication practices described above was September 1, 1957. No coupons for photographic services are now sold. Any photoduplication coupons sold by the National Library of Medicine or the Armed Forces Medical Library previously and still outstanding will be honored. Those who desire to use their coupons for the purchase of photocopies may still do so. Refunds for unused coupons will also be made upon request.

The CURRENT LIST OF MEDICAL LITERATURE is for sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. Price: $15.00 per year; $20.00 foreign. All communications regarding subscriptions should be addressed to the Superintendent of Documents.

The printing of this publication has been approved by the Director of the Bureau of the Budget, 6 June 1956.
